

# Roller Shades

## Small to Extreme Rollers

**S35 Small roller shade system** is designed for small sized applications. Engineered to give the blind a more proportioned overall finish, it features our patented Easy-Lock™ technology, ensuring effortless installation. Additionally, the S35 has the option of spring assist booster technology and is available in a neat square-edge profile bracket design, for minimal light gaps. The S35 is also compatible with our CF75 cassette.

**S40 and S45 Medium roller shade system** universally meets the needs of most window furnishing requirements. Featuring our patented Easy-Lock™ for efficient and effortless installation this system offers three control solutions - motorised, chain and spring. **RB08** remains a popular and reliable solution. Meanwhile, **RB09** is offered in both guided and geared versions.

**S60 Large roller shade system** is designed to withstand the weight of heavier shading applications, capable of holding up to 25kgs. The robust design is available in chain, motorised or crank gear control options. The chain control can be expanded with high performance spring boosters, available in three strengths. S60 systems have two aluminium tube options, 60mm and 80mm. The FRS120 valance is available as a decorative cover.

**S100 Extreme roller shade system** is designed for both internal and external, large, commercial applications. The S100 is robust, secure and performs effectively for motorised roller shade applications up to 7 meters wide.

# Spring Operated Solutions

Experience the convenience of Rollease Acmeda's user friendly spring operated roller shade solutions, which feature sleek aesthetics and eliminate the need for free hanging cords or chains.

**Pull Stick**  
For hard to reach shades

**Easy Spring Air** embraces cordless freedom with the Easy Spring Air roller shade solution that provides effortless and precise shade positioning.

Fine-tune the shade's spring tension after installation for optimal balance. An optional pull stick is available for hard-to-reach shades.

**Easy Spring Wand** offers dual operation, allowing users to control the shade with a weight bar or a wand for hard-to-reach installations.

The system's advanced auto-rise feature ensures smooth and controlled elevation. With a gentle pull, the shade stops at the fully open position.

**Easy Spring Ultra** is similar to the Easy Spring Wand in functionality, however it is simply operated via the weight bar.

## DUAL SHADES REINVENTED

Aero™ reinvents the traditional dual roller shade system and introduces an innovative two shade solution, controlled with only one chain, thanks to its intricately designed, patented technology.

Minimal and unobtrusive, Aero neatly houses two shades in a slim 103mm x 135mm aluminium cassette, perfectly balancing light filtration and blockout, conveniently and compactly.

Aero is award-winning and child safe, boasting a contemporary design, Auto-rise technology that can be activated from both the chain or the weight bar, and easy one-touch limit setting.

AUTOMATE®

## Motorised Shades

As homes get smarter, so should shades. Our Automate division offers specialised shade motorisation hardware and the latest in smart home technology.

Automate delivers a suite of motors, controllers, sensors and smart home integrations, that easily adapt with all of Rollease Acmeda's internal hardware. Create a variety of internal motorised shade solutions and ensure the most enriched and effortless experience with smarter shades.

## CF Suite and Fascia's

Our **CF suite** offers a comprehensive collection of head box styles, controls and side channel options with improved performance, functionality and aesthetics. The contemporary round or square head box profiles are available as fascia or fully enclosed cassettes and are designed to house our S35, S40 & S45 roller systems. This modular system features adaptable edge side channels for optimum energy efficiency and increased light blockout.

**FRS fascia** for roller blinds is available in two popular sizes - 100mm and 120mm - ensuring compatibility with any application, whether small or large. All fascias offer a unique fabric attachment option to match any existing décor and are also compatible with our S40, S45 and S60 roller shade systems.

## CF90 Bottom up

Perfect for ground floor home or office applications, our Bottom Up system is the innovative answer for a balance of natural light and perfect privacy.

Completely shaded from the bottom, Bottom Up lets the light in from the top, rather than blocking out the sun completely. Our system conveniently utilises CF90 cassette & S45 hardware to create an entirely reversed, yet exceptional experience, complete with our unique cord adjusting system and self-levelling hem bar.

## Zipscreen Skylight

The Zipscreen Skylight system offers the perfect solution for light block out in any horizontal or sloped windows. Using secure z-LOCK™ channels, the system achieves perfect tension of fabric in all directions keeping the fabric smooth and taut.

Conveniently motorised, the Zipscreen Skylight ensures ultimate energy efficiency, effectively controlling natural light and heat in both commercial and domestic applications.
