

ROLLEASE
ACMEDA®

Advanced Child
Safe Solutions

Safe by design

Rollease Acmeda is committed to providing window covering solutions that prioritize the safety of children and pets.

Our comprehensive range includes chain safety tension devices, spring operated, and motorized solutions that comply with WCMA and Health Canada regulations.

Flex Chainhold

Chain Safety Devices

Rollease Acmeda's Chain Safety Devices can be added to existing chain operated roller shades, ensuring a child safe window furnishing solution for any home.

CHILD SAFE

WCMA compliant

Flex Chainhold & Cordhold

Flex Tension Devices offer a premium UV-resistant solution for roller and roman systems. Featuring a Tension Lock and Self-Adjust Tensioning, they adapt to chain and cord stretch over time. With versatile mounting options and durable construction, they ensure smooth, long-lasting performance in both residential and commercial settings.

WCMA compliant

Chainhold

The Chainhold is a seamless, integrated solution that tensions the shade chain. It securely anchors to the wall when installed in the window frame or on the frame surface and is available in UV-resistant clear, white, black, or gray finishes to complement any interior décor.

WCMA & HC compliant

Chain Shield

The Chain Shield elegantly encases the shade's chain without needing wall mounts. It leaves 8 inches of chain exposed for easy shade adjustment and is crafted with a clear, UV-resistant, durable coating.

Spring Operated Solutions

Experience the convenience of Rollease Acmeda's user friendly spring operated roller shade solutions, which feature sleek aesthetics and eliminate the need for free hanging cords or chains.

Pull Stick
For hard to reach shades

Easy Spring Air

Embrace cordless freedom with the Easy Spring Air roller shade solution that provides effortless and precise shade positioning.

Fine-tune the shade's spring tension after installation for optimal balance. An optional pull stick is available for hard-to-reach shades.

Easy Spring Wand

Offering dual operation, the Easy Spring Wand allows users to control the shade with a weight bar or a wand for hard-to-reach installations.

The system's advanced auto-rise feature ensures smooth and controlled elevation. With a gentle pull, the shade stops at the fully open position.

Easy Spring Ultra

Similar to the Easy Spring Wand in functionality, however it is simply operated via the weight bar.

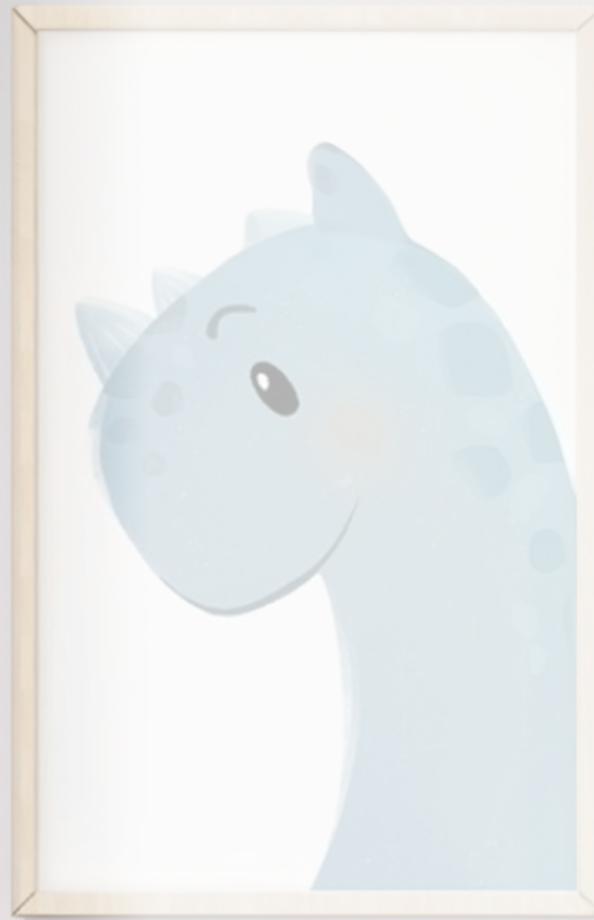

Motorized Solutions

An entry-level selection of child safe, cordless motorized products designed to seamlessly bridge the gap between manually operated shades and premium automation.

Basics
AUTOMATE.

Magnetic Wand Control Motor

Magnetic Wand Control Motor

The Magnetic Wand Control Motor is battery powered and offers essential up, down and stop functionality - all controlled with a convenient 36 inch magnetic detachable Wand. The Wand can be used to control several shades in any given room or home and can be detached and stored away when not in use.

Remote Control Motor

This battery powered Remote Control Motor provides unparalleled ease of use. It can be installed next to the shade and offers quick and easy control. It has essential functionality plus five convenient channels for single or grouped shade control.
